8. Details in the form of plans, elevations/sections:			
a. Accessible ramps			
b. Accessible stairs			
c. Accessible lifts/elevators			
d. Accessible entrances, corridors and walkways			
e. Accessible functional areas/comfort rooms			
f. Accessible switches			
g. Accessible drinking fountains			
h. Accessible public telephone booths			
i. Accessible audio visual and automatic alarm system			

j. Accessible audio visual and automatic alarm system			
k. Reserved parking for disabled persons			
l. Typical wall/bay sections from ground to roof			
m. Stairs, interior and exterior			
n. Fire escapes/exits			
o. Built-in cabinets, counters and fixed fixtures			
p. All types of partitions			
9. Schedule of Doors and Windows showing their types, designations/marks, dimensions, materials, and number of sets.			
10. Schedule of Finishes, showing graphic form: surface finishes for floors, ceilings, walls and baseboard trims for all building spaces per floor level.			
11. Details of other major Architectural Elements			
b. Architectural Interiors/Interior Design			
1. Space Plan/s or layout/s of architectural interior/s.			
2. Architectural interior perspective/s.			
3. Furniture/furnishing/equipment/process layout/s.			
4. Access plan/s, parking plan/s and the like.			
5. Detail design of major architectural interior elements.			
6. Plan and layout of interior, wall partitions, furnishing, furniture, equipment/appliances at a scale of at least 1:100.			
7. Interior wall elevations showing: finishes, switches, doors and convenience outlets, cross window sections with interior perspective as viewed from the main entrance at scale of at least 1:100.			
8. Floor/ceiling/wall patterns and finishing details.			
9. List of materials used.			
10. Cost estimates.			
c. Plans and specific locations of all accessibility facilities of scale of at least 1:100.			
d. Detailed design of all such accessibility facilities outside and around buildings/structures including parking areas, and their safety requirements all at scale of 1:50 or any convenient scale.			
e. Fire Safety Documents			
1. Layout plan of each floor indicating the fire evacuation route to safe dispersal areas, standpipes with fire hose, fire extinguishers, first aid kits/cabinets, fire alarm, fire operations			

EVALUATION CHECKLIST

room, emergency lights, signs, etc.
